

Case-Study-3: Birthday Card using Transitions & Animations:

Input code:

```
<html>

<head>

  <title>Happy Birthday</title>

  <style>
    body{
      margin: 0;
      height: 100vh;
      display: flex;
      justify-content: center;
      align-items: center;
      background: linear-gradient(115deg, blue);
      font-family: Arial, sans-serif;
      overflow: hidden;
    }

    .card{
```

```
width: 380px;
padding: 40px 25px;
background: yellow;
text-align: center;
border-radius: 30px;
box-shadow: 2px 4px 6px 8px skyblue;
animation: suthees 1.5s ease;
}
```

```
h1 {
  color: violet;
  font-size: 32px;
  text-shadow: 2px 2px 8px skyblue;
  animation: glow 1s infinite alternate;
}
```

```
.cake {
  font-size: 100px;
  margin: 20px;
  animation: suthees1 1s infinite alternate;
```

```
}
```

```
.name{  
    color: green;  
    font-size: 25px;  
    font-weight: bold;  
}
```

```
p{  
    color: black;  
    font-size: 18px;  
    line-height: 1.5;  
}
```

```
button{  
    margin-top: 15px;
