# INTRODUCTION

The Personal Portfolio is a web-based application designed to showcase my education, skills, projects, achievements, and interests in a simple and professional manner. It provides visitors with an easy way to learn about my background and technical abilities.

The main purpose of this project is to create a professional online presence and present my work in an organized way. The portfolio includes sections such as About Me, Skills, Education, Projects, and Contact Information.

Overall, this project demonstrates my creativity and practical knowledge of web technologies while providing a clear and attractive platform to showcase my profile.

# INPUT CODE

```
<html>
<head>
<title>My Portfolio</title>
```

```

<style>
  body {
    font-family: Arial;

## Hello, I'm Sreesutheesna Ram T

Data Science Student  
Welcome to my Portfolio

### About Me

I'm a student who interested in Data Science and Web Development. I enjoy learning Python, HTML, CSS, and UI/UX Design. I like creating simple projects and improving my technical skills.

### My Skills

**Python**  
Programming

**HTML & CSS**  
Web Development

**Data Science**  
Data Analysis

### My Projects

**Parking lot allocation management system**  
A web project for parking lot allocation.

**Cricket Data Analysis**  
A data analysis project using cricket data.

**College Event Page**  
A responsive webpage using HTML and CSS.

# CONCLUSION

The Personal Portfolio project provides a simple and attractive way to showcase my skills, education, projects, and achievements in one place. It helps present my profile professionally and allows visitors to easily understand my technical abilities and interests.

Through this project, I have applied web development concepts to create a clean, organized, and user-friendly website. The portfolio can be further improved by adding more projects, certifications, animations, and interactive features.

Overall, this project demonstrates my creativity, technical skills, and ability to build a professional online presence using web technologies.
