INTRODUCTION

The Resume Website project provides a simple and professional way to showcase my education, technical skills, projects, certifications, and career interests in one place. It helps present my profile clearly and allows recruiters or visitors to understand my technical abilities and experience easily.

Through this project, I have applied HTML and CSS concepts to create a clean, structured, and user-friendly resume webpage. The website can be further improved by adding responsive design, animations, interactive elements, and additional projects and certifications.

Overall, this project demonstrates my web development skills, creativity, and ability to present my professional profile effectively using web technologies.

INPUT CODE

```
<html>
<head>
<title>My Resume</title>

<style>
  body {
font-family: Arial, sans-serif;
background-color: white;
margin: 0;
padding: 0;
  }

  .resume {
width: 800px;
margin: 30px auto;
background-color: white;
padding: 30px;
box-shadow: 1px 3px 10px black;
  }

  .header {
text-align: center;
background-color: yellow;
color: black;
padding: 20px;
  }

  .header h1 {
margin: 0;
  }

  .header p {
margin: 8px;
  }

  h2 {
```

```
color: black;
border-bottom: 2px solid gray;
padding-bottom: 5px;
}
```

```
p, li {
font-size: 16px;
line-height: 1.6;
}
```

```
ul {
padding-left: 25px;
}
```

```
.section {
margin-top: 25px;
}
```

```
.skills span {
display: inline-block;
background-color: red;
color: white;
padding: 8px 15px;
margin: 5px;
border-radius: 5px;
}
```

```
.footer {
text-align: center;
margin-top: 30px;
color: gray;
}
```

```
</style>

About Me

I am a passionate and motivated Data Science student with a strong interest in Python, data analysis, machine learning, and web development. I enjoy working on real-world projects, exploring new technologies, and developing solutions that improve my technical and problem-solving skills. I am always eager to learn, grow, and apply my knowledge in practical environments.

Education

MCA - Data Science

Alliance University, Bangalore

Bsc-Computer Science

Sri Ramakrishna Mission vidyalaya,coimbatore

Skills

Python

HTML

CSS

JavaScript

SQL

Data Science

Projects

Parking Lot Allocation Management System

A Python and SQL-based system that manages parking slot allocation efficiently. It helps users find and allocate available parking spaces, records vehicle entry and exit details, and calculates parking charges automatically, reducing manual work and improving parking management.

Cricket live Prediction Data Analysis

A data science project that analyzes live cricket match data to predict match outcomes and player performance. It uses real-time match statistics, scoring patterns, player performance, and team data to generate insights and predictions during the match.

Certifications

Artificial Intelligence

Python Programming

Data Science

Web Development

OUTPUT CODE:

CONCLUSION

The Resume Website project successfully presents my personal profile, education, technical skills, projects, and certifications in a clear and professional format. It provides an organized way to showcase my abilities and career interests.

Through this project, I gained practical experience in HTML and CSS and learned how to design a simple, structured, and user-friendly webpage. This project also helped me improve my creativity, web development skills, and understanding of webpage styling.

Overall, the project demonstrates my ability to create a professional online resume and apply basic web development concepts to a real-world application.
